TRAINING FOR BUSINESS

Welcome

Kerry Vollmer

Training Co-ordinator

Since our inception in 1987, we have been dedicated to IT skills development. This longstanding experience has culminated in Sicon establishing us as their authorised training provider. As a e Sicon Training Centre, all courses are designed specifically for Sage Partners, to broaden your expertise in the Sicon modules. This enables Partners to deliver outstanding support and deep product knowledge to your clients, enhancing your service offering. Discover the course benefits:

- **Trusted Sage Community Member:** Recognised for our discretion within the Sage partner community, we excel in maintaining partnership integrity, as shown by our longstanding Sage cloud hosting services, used by several Sage Partners.
- **Decades of Training Excellence:** Rooted in almost four decades of corporate training knowledge, we deliver comprehensive and engaging training courses, drawing from a rich history of corporate training experience.
- **Official Sicon Authorisation:** As an authorised Sicon training provider, we're aligned with the latest version content, ensuring up-to-date module knowledge.
- **Optimal Learning Environment:** Located centrally in Northampton, our comfortable, air-conditioned training facilities are easily accessible by road and rail, creating a perfect setting for learning and development.
- **All-Inclusive Resources:** Delegates have access to laptops and a hosted training environment, along with refreshments, lunch, course materials, and certificates, ensuring a complete learning experience.
- **Commitment to Trust and Knowledge:** Understanding the importance of commercial integrity, we focus on enhancing skills while upholding trust and collaboration within the Sage Partner network. We firmly believe in the sanctity of partner relationships. Hence, we guarantee that no client information will be shared, allowing you to engage with us in complete confidence.

Sicon Training Courses for Sage Partners

Modules

Welcome to your Sicon Training Courses	02
Kitting	05
Material & Resource Planning (MRP)	06
Works Order Processing (WOP)	07

“ All our courses are conducted in-person with a skilled trainer, offering a unique opportunity for hands-on learning and collaborative problem-solving. This immersive environment fosters deeper understanding, allows immediate feedback, and builds professional connections that extend beyond the classroom. ”

Sicon Module Training Courses: Designed Specifically for Sage Partners

Kitting

This course offers an in-depth look at how Sicon Kitting, a single level bill of materials module, integrates with Sage 200, providing an efficient solution for building finished products.

Key features include full integration with Sage 200 and real-time data availability, ensuring up-to-date business information. Additionally, when combined with Sicon MRP, it extends functionality for kit and component demand suggestions, and with Sicon Barcoding & Warehousing, kits can be managed directly from a handheld device. This course will equip you with the knowledge to assist your clients in improving stock control, cost management, and streamlining their manufacturing processes.

This course will show you how your client can create kit templates, kit items or how kits can be built up from individual components.

Course Outline

- Module Settings
- User Permissions
- Design Kits
- Build Kits
- Active Kits
- Kit Templates
- Amend & Allocate Kits
- Disassembly
- SOP Integration, Convert Quote to SO
- Import Kits

Knowledge Prerequisites:
Sage 200

Course duration:
½ day

Refreshments & light bites

Free on-site parking

Material & Resource Planning

The Sicon Material and Resource Planning (MRP) training course is designed to enhance manufacturing efficiency. It integrates with Sage 200, offering features like suggested Works Orders and Purchase Orders to fulfil demand.

This module includes Rough Cut Capacity Planning, providing a real-time graphical interface for managing labour and machine demand against availability.

It's an ideal solution for businesses seeking to optimise their manufacturing processes and resource planning in a streamlined, efficient manner.

This course will show you how your clients can generate suggested works orders and purchase orders based on current and future stock needs. It calculates potential delivery dates for manufactured items considering resource availability, managing labour and machine resources, accounting for non-working periods, and optimises purchase orders according to supplier lead times and order quantities.

Course Outline

- Module Setup, Utilities and Maintenance
- Material Planning
- Stock Movements & Running Balances
- Forecasts
- Make to Stock
- Capacity Planning

Knowledge Prerequisites:
Sage 200 & BOM

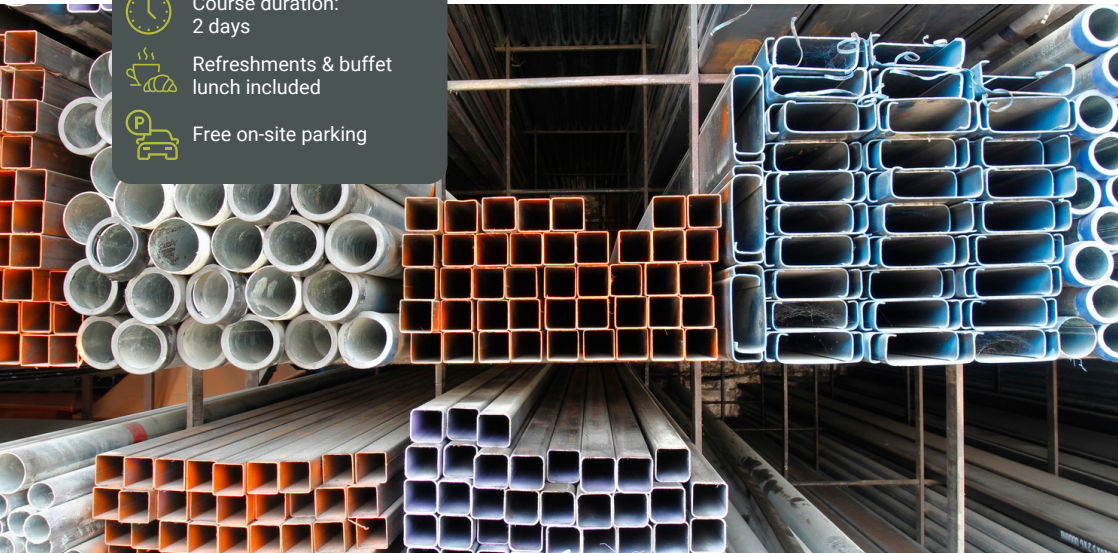

Course duration:
2 days

Refreshments & buffet
lunch included

Free on-site parking

Works Order Processing

The Works Order Processing (WOP) module training course focuses on enhancing manufacturing management for your clients.

This in-depth course covers how the module assists in detailed tracking of production data, including resources like stock, labour, and machinery.

It's particularly beneficial for businesses aiming to improve visibility and control over production costs and inventory levels.

By integrating with Sage 200, this module streamlines manufacturing workflows, offering valuable insights for Sage Partners to help your clients optimise and refine manufacturing operations.

Course Outline

- WOP Setup, Maintenance and Utilities
- Works Orders
- Templates
- Estimates
- Processing
- Enquiries
- Reports

Knowledge Prerequisites:
Sage 200 & BOM

Course duration:
1 day

Refreshments & buffet
lunch included

Free on-site parking
